02 | BASIC ELEMENTS

CABINETRY

CABINETS AND CORNER CABINETS

COUNTERTOPS

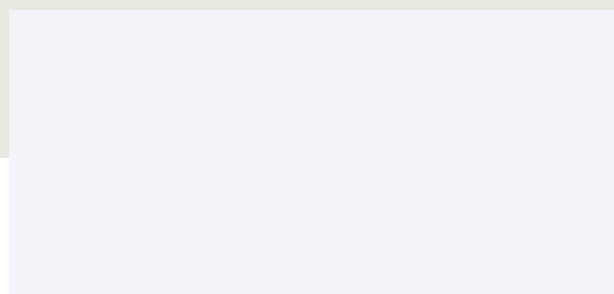

CABINETS

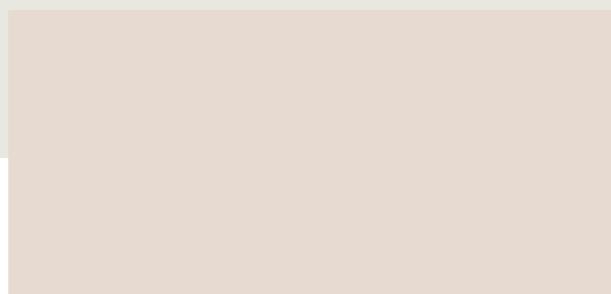

Elegant. Refined. Sophisticated. With the right color scheme, BURNOUTLUX Outdoor Kitchens are a perfect fit for a life worth savoring. Inspired by nature, the BURNOUTLUX palette complements and accentuates the surrounding environment, creating the optimal fit for every setting: chalk cliffs or summer clouds – the “Pure” palette brings the necessary lightness. “Dust” evokes the pristine feeling of the beaches of the South Pacific. and “Dawn” and “Shadow” reflect a sophisticated reserve.

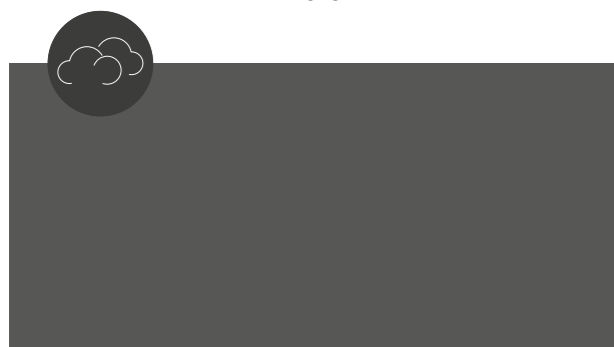

Note: BURNOUTLUX Outdoor Kitchens are available in four different colors. We recommend using Dawn and Shadow in relatively well-shaded areas, as intensive solar radiation may cause the surfaces to become hot.

Materials

Burnout Outdoor Kitchens are designed for outside use. Made of high-quality stainless steel and weatherproof, UV-resistant materials and fittings certified for outdoor use. Built to last: at least 10 years. Guaranteed (Limited Lifetime warranty).

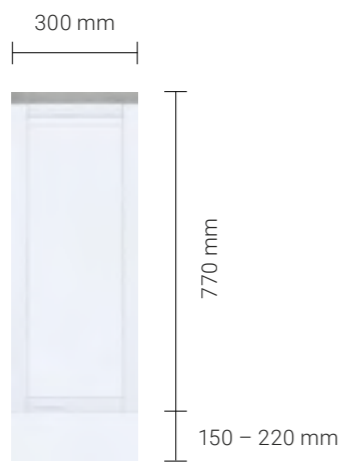

Plinth / Toe kick

- The polymer material used for the panels is also used for the plinth/toe kick.
- The plinth/toe kick can be modified on site with common carpentry tools (jigsaws, circle saws, drills, etc.) to trim to the necessary height.
- The plinth/toe kick can also be removed and opened at any time, for example to clean underneath the cabinetry.

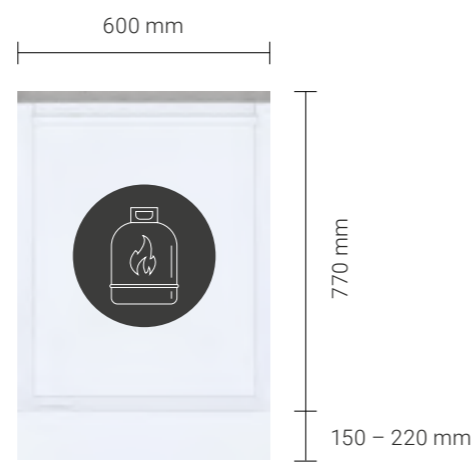

CABINETS

With designer fittings its elegant and its elegant front panels, cabinetry is a key design element in BURNOUTLUX Outdoor Kitchens. Its depth allows ample storage, and its convenient inserts for silverware and utensils mean that the necessary things are always close at hand. This makes the cooking experience even more enjoyable.

- Large drawer for storage
- Upper drawer for silverware and other smaller utensils
- 750 mm deep

Caso BBQ Cooler Large Lux
At bar counter level

DRAWER REFRIGERATOR

Integrated drawer refrigerators from Fisher & Paykel offer additional storage for food and are the perfect complement to a BURNOUTLUX Outdoor Kitchen. One particular highlight is the variable temperature control. This makes the drawer convenient for various types for food and beverages, such as the clever “chill function” which is ideal for defrosts meat or fish.

- Additional storage space
- Variable temperature control with adjustable cooling zone (from -18° to 15° C)
- Precise temperature maintenance
- Additional freezing options
- 104 l total volume / 80 l useable volume

An ideal solution for unused space (750 x 750 mm) in the corner cabinets

ICE BUCKET

Champagne and open bottles of wine and water need a cool solution so they are quickly available and refreshing even when the heat is on. Et voilà!

05 | UTILITIES

LIGHTING

ELECTRICITY SUPPLY

WATER CONNECTIONS

LIGHTING

FOR PLINTH AND BAR COUNTER

Cleverly positioned lighting and appropriately placed sockets create a powerful visual impact. After all, as we know: food should also be a feast for the eyes.

- ZigBee capable
- Remote control function included
- Dimmable
- Warm white
- IP44 standard

ELECTRICITY SUPPLY

With BURNOUTLUX, you are not only deciding for a perfect Outdoor Kitchen, but also for perfect service. That begins with perfect consultation and planning, followed by on-site measurements, right up to timely delivery and installation.

Service: Our technicians install all electrical components.

Details about Outlets:

- IP68 certified system
- 16 A 250 V~ outlets with hinged covers
- Unbreakable thermoplastic housing
- Waterproof flush-mounted IP44
- Anthracite
- Stable and corrosion-resistant steel flange

Additional Openings in Cabinetry:

If a chase needs to be opened in the rear of the Outdoor Kitchen to install cables or wires, for example, this can be done with common carpentry tools (drills, circle cutters, etc.).

MADE IN GERMANY

FRANKE

WATER CONNECTIONS / SINKS

A water source right next to the fire source: with premium sinks from Franke made of stainless steel, everything can stay clean even during the grilling process. Rinse the lettuce, even clean a plate or two. As convenient as the indoor kitchen – nothing is more practical!

- Top-quality workmanship
- Sink size 500 x 410 x 200 mm
- Stainless steel faucet connected to the main water supply or to an optional drinking-water supply
- Dark sinks for dark kitchens and light sinks for light kitchens

DINING**

*BAR COUNTERS
AND INTEGRATED TABLES*

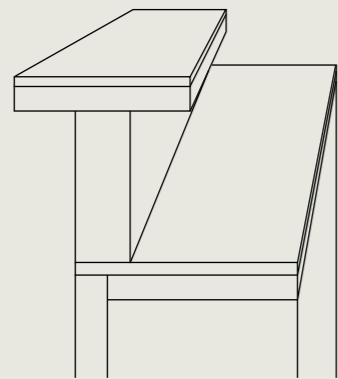

SINGLE TABLES AND SEATING

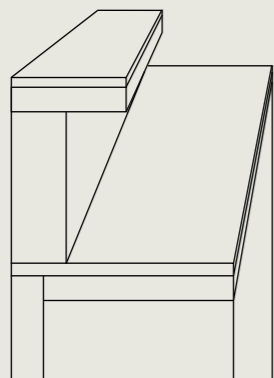

BAR COUNTERS

The great thing about a Burnout Outdoor Kitchen is that it can be expanded at any time. For instance, with optional corner counter elements, providing more practical storage space.

- Convenient storage spaces for glasses or kitchen utensils
- Can be added as a corner extension
- Possibility of lighting and electrification

T-Bar counter
For freestanding kitchens

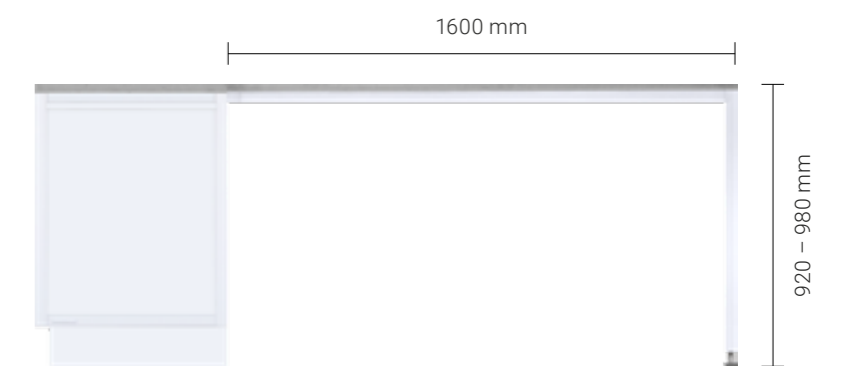

L-Bar counter
For wall-mounted kitchens

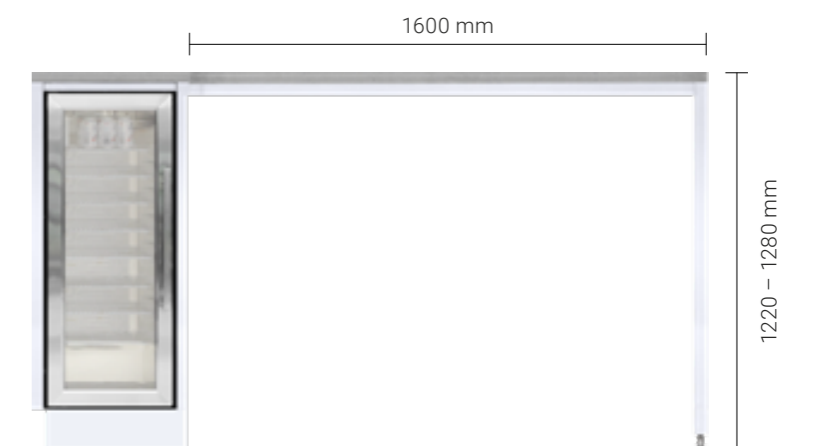

INTEGRATED TABLES

Our BURNOUTLUX integrated tables offer the possibility to sit directly in front of the action. They are available at two different levels – at kitchen counter level or bar counter level.

Integrated Kitchen Table
At kitchen counter level

Integrated Counter Table
At bar counter level or above the refrigerator

SINGLE TABLES

Enjoying the good things in life, sharing laughter, celebrations and life. Even the most attractive outdoor kitchen is doubly attractive with the right guests. And because we know how important perfection is when it comes to entertaining, we have designed tables and chairs to match BURNOUT **LUX** Outdoor Kitchens.

Just as elegant in design, perfectly finished, and durable. With a stone top and stainless steel frame, it's made for outdoor living.

07 | GOOD TO KNOW

QUALITY AND DESIGN

CERTIFICATIONS

PRODUCTION

EXCELLENT CRAFT & DESIGN

MADE IN GERMANY

Compatible

Burnout outdoor kitchens are easily compatible with a variety of grill and hotplate manufacturers. That's clear. Still, our top priorities are functionality, craftsmanship, and design. Which is why we are happy to recommend partners who meet our requirements – like Flammkraft, BULL, or Fire Magic, for example.

Weatherproof

Burnout outdoor kitchens are built for the outdoors. Made of high-quality stainless steel, weather-resistant and UV-resistant materials, and hardware certified for outdoor use. So they last: At least ten years. Guaranteed. (Limited Lifetime warranty).

Made in Germany

The craftsmanship of Burnout outdoor kitchens is unparalleled. And come pre-assembled from our own manufacturing plant in Germany. With precision in every cut. Perfection in every weld. Exactness in every seam. For more enjoyment and greater durability.

Modular

Burnout outdoor kitchens can be modified as your needs evolve. One way today. Another way tomorrow. That won't change: our outdoor kitchens are modular and therefore can always be adapted to new wishes. Even years from now, you will be able to expand it without any alterations in the colour scheme.

Sustainable

Burnout outdoor kitchens are extremely durable. And at the same time, they are fully recyclable at the end of their life. Because withstanding wind and weather does not mean being limited to using PVC. Quite the opposite: we only use PVC-free materials to build our kitchens.

reddot winner 2022

CERTIFICATIONS

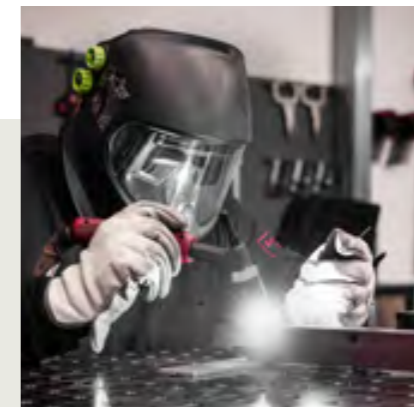

PRODUCTION

HANDMADE WITH THE BEST, BY THE BEST

We take things personally – and we like it that way. Because each of our outdoor kitchens is unique, and tailored to your individual needs. And to make sure that we are able to put our hands in the fire for each of our outdoor kitchens, we manufacture them with all the attention to detail and quality found in Good Old Germany.

To be precise, in Bissendorf at our "Manustrie" – as we like to call it. It is a combination of the German words Manufaktur (handcrafted production) and Industrie (robot-supported industrial production). This allows us the best of both worlds, for every step of the production process. Because this is the only way to combine our passion for fire and flame and give it the freedom it needs: meticulous, industrial precision combined with the finest craftsmanship by our highly trained, attentive specialists.
